

1. **GitHub Repository Link** (5 points)

- Provide the link to your GitHub repository for TAs to view the code. Code should include unit tests.
- <https://github.com/CabrrHernan/4353-Group-17>
-

2. **Backend Technologies** (2 points)

- List what backend technologies you are using and why.
 - i. **Flask**: For handling the backend logic and serving API endpoints.
 - ii. **JWT (JSON Web Tokens)**: Used for authentication and session management.
 - iii. **Bcrypt**: For hashing passwords.

3. **Team Contributions** (3 points)
